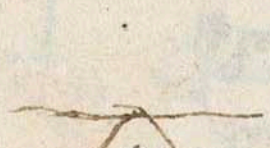
Il moto composto da due moti equabili, che si fanno in linee rette, che formano angoli dati con la linea del piano inclinato, è equabile.

Sia il piano inclinato AB, la cui altezza sia CB, la base AC, e la lunghezza AB. Dico, che il moto composto da due moti equabili, che si fanno in linee rette, che formano angoli dati con la linea del piano inclinato, è equabile.



Imperocchè il moto fatto dalla linea AB, è equabile, e la linea AB è tirata per il punto A, e la linea AC è tirata per il punto A
