Q-1:- (A) Write the correct option a,b,c and d in the space provided against each part.   (5)

(i)   Number of equal sides in an Isosaless triangle are _____.
a) 3   b) 4   c) 2   d) 5 Type equation here.

(ii)   External angle of an octagon is _____.
a) 90°   b) 45°   c) 60°   d) 30°

(iii)   A rectangle prism whose length, breadth and height are equal is _____.
a) Ellips   b) Circular Cone   c) Cube   d) Cylinder

(iv)   Cross-section of a hallow cylinder is _____.
a) Circle   b) Annulus   c) Ellips   d) Cone

(v)   Two vectors x and y are equal if:
a) $x \neq y$ b) $x = y$ c) $x < y$ d) $x > y$

(B) Tick ($\sqrt{}$) True or False in the following statements:

(i)   Interior angle of a hexagon is 120°.   (True / False)

(ii)   The space enclosed between two concentric circles is $\pi\gamma$.   (True / False)

(iii)   Slant height of the pyramid is cu.m   (True / False)

(iv)   Matrix A is skew-symmetric if $A^t = A$ (True / False)

(v)   Let A be a square matrix; A^{-1} exists if $|A| = 0$ (True / False)

(C) Select the correct answer of each statement in column No.1 from column No.2 and place its identifying letter a,b,c etc in space provided against each statement in column No.1.   (5)

Column No.1		**Column No.2**
(i) Simpson's Rule is applicable only for number of strips -----		πrl
(ii) Curved surface of the cone is	---------	$4\pi r^2$
(iii) Surface area of a ball of radius r is	---------	odd
(iv) Considering scalars and vectors, the earth is	---------	even
(v) A matrix is singular if the value of its determinant is ---------		zero

Q-2:- (i) Find the area of an equilateral triangle each side is 36 cm long.

(ii) Define square, rectangle and parallelogram.

(iii) A regular decagon is inscribed in a circle, the radius of which is 10 cm. Find the area of the decagon.

(iv) Find the circumference of the circle whose radius is 20.5 cm.

(v) Define irregular figure, write the formula of simpson's rule.

(vi) For a polygonal prism (having a polygon base); write its volume, lateral surface area and total surface area.

(vii) What is the difference between circular cylinder and alliptic cylinder.

(viii) Find the area of the base of a pyramid whose base is an equilateral triangle of side 1 m and whose height is 4 m.

(ix) Define cone and write the formula for volume of the cone and total surface area.

(x) Find the surface area of a sphere with a radius of 22.5 cm.

(xi) Define vector, scalar and null vector.

(xii) Find the magnitude of the vector $\vec{a}$ where $\vec{a}$ = - 3i + 4j – 2k.

(xiii) If $A = \begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$, $B = \begin{bmatrix} 3 & 2 \\ 0 & 1 \end{bmatrix}$ Find AB.

(xiv) Evaluate $\begin{vmatrix} 1 & -3 & -2 \\ 4 & -1 & 0 \\ 4 & 3 & -5 \end{vmatrix}$ by minors.

(xv) Prove that; If all the elements of a row of a determinant is zero. Then the value of the determinant will be zero.

(SECTION – C   Marks:27)

Note: - Attempt any three questions from this section. Each question carry 09 marks.

Q-3:- Find the area of the Quadrilateral ABCD in which the sides AB, BC, CD, DA and the diagonal AC are 25, 60, 52, 39 and 65 meters respectively.

Q-4:- Find the area of the segment whose chord is 10 m and whose height is 1.5 m.

Q-5:- A hallow cylindrical tube open at both ends made of iron ½ cm thick. If the inner diameter is 5 cm and length is 96 cm. Find the volume of the iron in it.

Q-6:- For the vectors $\vec{a} = 5i - 3j + 4k$ and $\vec{b} = j - k$. Determine sin of the angle between $\vec{a}$ and $\vec{b}$.

Q-7:- Solve the following system of equation by cramer's rule.

$$x + y + z = 4$$

$$2x - y - 2z = -1$$

$$x - 2y - z = 1$$

Do you make full use of your shorthand or are you one those shorthand writers who go to meetings without taking along a note book? Do you write your friends in longhand, all though both they and you know the same system of shorthand writing? Is shorthand writing a natural thing with you, or is it something which you use only when you are called upon to use is for special purposes.

Many of us have herd on the air from time to time the talks which have been carried on with people standing about the streets one day the question put to these peoples took the form of asking them whether they like there work, and the suggestion was that if they liked there work it was probably because they were good at it. There is much truth in this suggestion, and I believe that the better the quality of the work which we do the more we like doing it. You will not often meet an expert in any trade or art who is not deeply interested in his work. I have yet to meet a shorthand writer who, having a real knowledge of the principles of our system. When recently we considered "happiness" we reached the belief that we have gone part of the way towards finding happiness if we have could say that we work "at home in the world."

60 WORDS PER MINUTE DICTATION

It was a lovely river. It was wide and full of water in both summer and winter. In summer the water was usually below, and it's never ending moment towards the see was so peaceful that it could not see expect by the most careful observation. In winter the water often rain more quickly and the color became blacker, but even so it continued to be a good river. It kept will with in its high banks, it was clean and did not have places they were dangerous for the little sailing ships that used it as a playground.

Not all rivers are so kind to those who live near them. Peoples used to live near or on the banks of rivers because they required clean water for the many purposes of life. Today water can be brought to people over considerable distances, and it is not necessary to live near a river to exist.in these days peoples like to live near rivers because they like to look at them or to sail on them. There are very few of us who don't find happiness and sitting and watching a large body of water. Houses that have good views of arriver are of the sea or of any other mass of water can usually be sold at a high price. There is always a demand for houses in such pleasing situations.

High point was such a house.it was one of a small number of large houses built on a piece of land some 200 or 300 feet above the river and the little town through which it passed. A Young woman sits at a wide window of high point, reading book the evening light on her golden coloring, and she was beautiful. She put down the book and looks out the well-kept grounds of the house and down to the river.

70 WORDS PER MINUTE DICTATION

Recently we wrote to you and stated that, unless we received your cheque by 16th February we should have to ask our lawyer to take steps to force you to pay the bill you owe us. Unfortunately you have not answered our note we must inform you that we asked our lawyer to go ahead and follow the usual method to make you pay. We are exceedingly sorry to have to do so but evidently this is the only way in which we can secure our money we certainly feel that we have acted quite fairly with you and as we have said this seems to be only thing left for us to do. If you mail yours cheque without the slightest delay you can avoid heavy cost and we advise you to do so as soon as you receive this.

I think the way in which we store goods if the factory is not altogether satisfactory.it seems to me that fire insurance rates are now quite high and I feel that when some changes in the store rooms reduce the rate might be expected. I should like you to inspect the rooms as soon as possible and if as a result of your inspection you think that our methods with respect to the storage of goods are unsatisfactory I wish you would suggest any changes which could be put into effect. I wish you would let me have the different insurance policies now in force together with the details of the scale on which the insurance rates are based so that I can make an analysis of the annual cost.

We have sent to you today a copy of our latest catalogue as well as some special booklets which we think you well like to have. When any new designs are issued we shall post details to you so that you well be up to the minute.
